

# Week 11 Check List

**No cheating, don't tick them off until you have completed the task 😊**

- Watch the introduction to list building, explaining what you have implemented already and the importance of list building.
- Create and edit a squeeze page using the template I provided.
- Upload your squeeze page to your domain name.
- Use giveaway sites to build your list, prepare your squeeze page and download page first, then find a giveaway site related to your gift and add it.
- Use an exit script to build your list. Using the exit splash code generator and your existing sales page and squeeze page.
- Use Ad Swaps to build your list.
- Use [Solo Ads](#) to build your list (great low cost option).
- Try to implement as many of the list building techniques that I showed you as possible. The more techniques you use and the more you duplicate these, the better!
- Continue to make posts on other students blogs that may be constructive, helpful or informative.
