

# Week 1 Check List

No cheating, don't tick them off until you have completed the task 😊

- Sign up with [D9 Web Hosting](#).
- Secure your own domain name, or as close as possible.
- Set up a new email account in your hosting using your new domain name.
- Add that new email account to your email client (outlook or live mail etc.)
- Extract a zip file.
- Edit a basic web page with your own details using HTML editing software.
- Upload a basic webpage to your domain name using FTP client software.
- Browse your new domain name and feel proud that you have accomplished so much in one short week.
